

With CIC's CrosXscore you can apply your company's unique rental criteria into our custom decision model to see whether an applicant meets your approval standards. Using the Combined CrosXscore, *up to 4 applicants at once* can be compared to see if they collectively are a good match for your property resulting in an **Accepted**, **Denied**, or **Conditional** response.

- ✓ Focuses on the applicant with the strongest credit, while still calculating the risks of applicant's with criminal and eviction hits
- ✓ Prints a separate scoring report to keep each applicant's information confidential
- ✓ Provides score factors and the source application so that the manager can quickly assess which application resulted in a less than favorable result
- ✓ No additional charge for a combined score on top of the individual CrosXscore
- ✓ Just like the CrosXscore, score terms may be changed to suit your property requirements
